

Certificate Course on

# INTEGRATED DIGITAL INTENSIVE CARE MANAGEMENT

# TRAINING REPORT

*-an initiative by IIHMR Bangalore and Cloudphysician Pvt. Ltd*

# Motivation

The onset of COVID 19 highlighted the tremendous gap in Intensive Care services in India. Lack of Intensive care beds, low availability of trained doctors (especially in especially in Tier II and III cities) along with the sudden rise in demand for intensive care bed availability kept hospitals on tenterhooks.

Work pressure on nurses and clinician to provide 24/7 quality care and on the Healthcare institution to allocate resources to the department mounted overnight. With digital disruption of healthcare, high-speed seamless internet availability, hi-resolution cameras and by up skilling the workforce on technical, clinical and new management fundamentals, there lies an opportunity to develop an ecosystem to accentuate the availability of timely and quality intensive care services in India

# Action

To address the community needs, IIHMR Bangalore in collaboration with Cloudphysician initiated a Certificate course on Integrated Digital Intensive Care Management to upskill the doctors and nurse and leverage remote intensive care monitoring technology to rapidly ramp up the accessibility and quality of intensive care treatment in India.

## Certificate Course on **INTEGRATED DIGITAL INTENSIVE CARE MANAGEMENT**

**6 MONTHS | LIVE ONLINE  
INTERACTIVE SESSIONS**

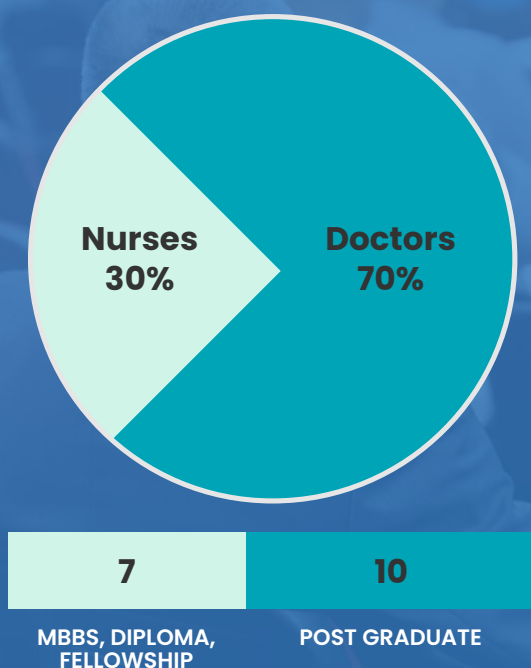

**Hands on experience on Digital  
Technology for Remote Monitoring and  
Management of Intensive Care**

# Outcomes

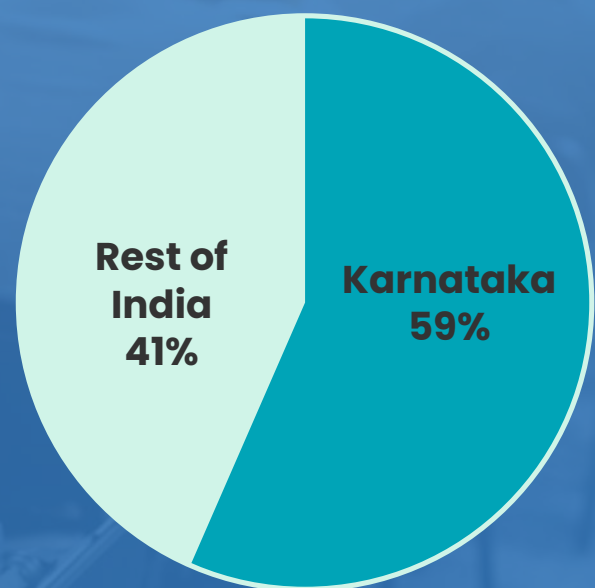

In Cohort 1, we upskilled 27 healthcare personals during 6 months for over 150 hours. Participants maintained 75% and above attendance in live online class interaction and review session by leading public and private healthcare leaders

## PARTICIPANTS

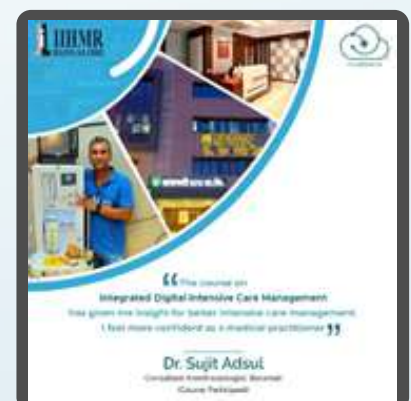

BY QUALIFICATION

BY GEOGRAPHICAL LOCATION

## SUCCESS STORIES
